

CS 61A Discussion 0

Lost on the Moon

1.

What do polar bears do?

They break the ice.

DEMO

The Facial Recognizerer™

Lost on the Moon

You are lost. You are also on the moon.
How do you survive?

Answers to Common Questions

- ▷ The horizon is ~2 miles away
- ▷ You are on the light side of the moon
- ▷ There is no cocaine in the first-aid kit
- ▷ FM radios are line-of-sight

NASAnswers / Debrief

1. Oxygen
2. Water
3. Stellar map
4. Food concentrate
5. FM receiver-transmitter
6. Nylon rope (useful for scaling cliffs / tying injured together)
7. First-aid kit
8. Parachute silk (protection from the sun)
9. Life raft (CO₂ bottle can be used for propulsion)
10. Signal flares
11. Pistols (possible self-propulsion)
12. Milk (bulky, made redundant by food concentrate)
13. Heating unit (useless on light side)
14. Compass (moon's magnetic field isn't polarized)
15. Matches (no oxygen to sustain flame)

It's quiz time

heh heh heh...
